### DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3,4,7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "said input terminal" in these claims lacks a proper antecedent basis and is unclear as to whose the input terminal is.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Constant (4,228,517).

Constant discloses in figures 1 and 2 an n-order IIR filter implemented by a lower-order IIR filter in a time-sharing basis, and including means (3) as the claimed decoder for sequentially sets the filter coefficients ( $\beta$ ) to the lower-order IIR filter.

Art Unit: 2124

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
